

Candles.

Candles look and smell nice but they are 'mini fires' and care needs to be taken near them.

More than five fires a day are started by candles.

Candles should be:

- ✓ in proper candle holders
- ✓ away from materials like curtains
- ✓ not put on plastic surfaces like TVs
- ✓ put out when there are no adults in the room.

Never play with candles; the hot wax can hurt you.

Only grown-ups should touch candles.

**Be careful
with candles**
