

If things go wrong...

If your escape route is blocked:

- If you can't get out, get everyone together in one room.
- If possible go to a room at the front of the building, with a window and a telephone.
- Put bedding, cushions or clothes around the bottom of the door to stop the smoke coming in.
- Open the window and shout for 'Fire! Help!'
- If you are on the ground or first floor you maybe able to get safely out the window.
- Throw bedding or cushions down on the ground and lower yourself carefully out with the help of an adult. Do not jump.

If clothes catch fire:

- Stop – do not run around as this makes the flames worse
- Drop –lie down
- Roll – roll around to smother the flames
