

Fire Safety Decision-Making Exercise

Your task

- Normans' Academy has just opened and you've been appointed as young fire marshals. Your job is to ensure staff and students are kept safe at all times from the risk of fire.
- As the presentation progresses you will encounter a number of scenarios. As a team you have to decide what you would do. For each decision you will be given 0, 5 or 10 points, the maximum number of points is 100.
- You will need a
 - decision making sheet
 - map of Normans' Academy
 - scrap paper to take down the scenarios

NORMANS ACADEMY

Roles

- In teams of 3 you will have a:
 - Crisis manager / Head student fire marshal – its your job to make the final decisions in the scenarios you're faced with.
 - Runner – its your job to collect the scenarios from the computer and relay them to your team. As well as deliver your decision to the teacher before the next scenario appears.
 - Mapper – its your job to map the events and scenarios that take place on your A3 Normans' Academy Plan.

Decision 1

1) It's the first day of school and your head teacher has approached you to ask if you'll be the student fire safety marshals. You're really chuffed and meet as a team of 3 to discuss your role. You quickly identify the importance of smoke alarms. Do you agree to test them?

Decision 2

2) The school opens and everyone is very excited. It's the first week and you've been in role for a few days. Do you ...

Decision 3

- 3) You're in the art room and notice that the teacher has covered the fire door with a display and pulled a drying rack in front of it. In your role as student fire marshal do you...

Decision 4

4) The head teacher comes to find you to discuss an incident in the corridor earlier. 2 students were found playing with the fire extinguisher do you suggest....

Decision 5

- 5) The head teacher likes the idea of an assembly and asks you as student fire marshals to deliver it. Do you ...

Decision 6

- 6) Your DT project needs a battery, you see the smoke alarm and know there'll be one in there. You take it out as you'll only need it for a moment – it works. It works so well and your mates are so impressed they all have a go of your buzzer circuit. But the battery runs out. As student fire marshal you're very embarrassed. Do you...

Decision 7

7) It's year 11's last day and they've been promising a mess up day for ages. A fire alarm goes off do you...

Decision 8

8) As you leave the IT room and turn down the science corridor which is your closest escape route you notice thick smoke pouring out of the classroom next to the door. Do you...

Decision 9

- 9) As you look back down the corridor you see that the science teacher's lab coat is on fire and he's running towards you. What do you do?

Decision 10

10) Once outside at the fire assembly point do you ...

- As a class, discuss and come up with 5 fire safety points that you've learnt as a result of this exercise:

- 1)
- 2)
- 3)
- 4)
- 5)
